Coronavirus Update

Associates in Obstetrics and Gynecology, P.C. is taking all precautions set forth by the CDC for the health and well being of our wonderful staff and patients. We are actively monitoring the Coronavirus pandemic and we will keep our patients informed of our office proceedings.

During this difficult time additional precaution will be the normal when patients call into schedule an appointment. We are asking if they are experiencing any of the following symptoms: Fever, Chills/Night Sweats, Headache, Coughing. If these are recent symptoms and not an ongoing issue due to allergies ect., we are asking patients to contact their Primary Care Physician and reschedule their appointment with us.

Although we are following CDC guidelines, we would encourage patients to stay home and continue their social distancing if they are not experiencing any Obstetrical and Gynecological issues. However, if you are experiencing any OB/GYN issues we will be here to provide care. Our office hours have changed during this time. Our office will only be open three days a week Mondays, Tuesdays and Thursdays until the current executive order is lifted and we can resume back to business as usual. Office hours will still be from 8:30 am to 5:00 pm on these days.

We also have placed restrictions on exposure to our office. At this time we will only bring back the scheduled patient to the exam/treatment/ultrasound rooms. All family members and guests are required to wait outside of our office. All patients will be screened and verified no fever or symptoms prior to entering our office.

Together, we will all get through this difficult time. We are hopeful that our country, states, county and our communities will be successful in the prevention and slowing of the coronavirus spread with the social distancing set in place. Please call us at 719-596-3344 if you have any questions or concerns.

The Staff at Associates in Obstetrics and Gynecology, P.C.
